Gather coins in a follow me and I will follow you back The goal of getting followers on Instagram is none other than to get your account to achieve greater weight and relevance and better position itself within this social network. With this tool, you can achieve this in a fairly easy way, although to start gaining followers, you first need to earn coins. First, enter the access data of the Instagram account you want to boost (this in itself involves some risk, since you are not sure who you are providing them to). Once logged in, you will see Instagram users to follow: for each person you follow, you will earn a coin. The purpose is to accumulate enough to start receiving follows from other profiles. This app has the ability to automate this following process, so you can forget about it and let it do its job while your coin count grows. Once you have enough coins, you can request lots of followers for your account. In other words, it's all about a follow me and I will follow you.
